

CMPE 202 Sec 48 # Project Journal

Team Name - TechSoldiers

Team Member – Raj Kinkhabwala

Sprint # 1 (Feb 26 to March 10)

1.What tasks did I work on?

- Read the project requirements and based on it, designed the initial DB design.
- Understood the frontend requirement and decided on the tech stack to use

2. What do I plan to do before the next weekly Scrum meeting?

- Worked on the frontend baseline
- Prepared for UI routing protection

3. What task blockers did I have?

- Setting up the frontend based on the tech stack proved to be more than anticipated

Sprint # 2 (March 11 to March 24)

1.What tasks did I work on?

- Constructed Basics of frontend boilerplate code
- AWS Cognito
- Refector search component to decouple from the UI.

2. What do I plan to do before the next weekly Scrum meeting?

- Backend for Login and Registration
- Integrating AWS Cognito to implement user roles
- Will be working on Auth module to use it on global state

3. What task blockers did I have?

- Redux implementation was a blocker.

Sprint # 3 (March 25 to April 7)

1.What tasks did I work on?

- Routes Protection
- Frontend integration and first set of bug fixes
- Implemented Auth Modal to open from any part of the application
- Worked on Room Listing page to integrate search and persisted states in the application.

2. What do I plan to do before the next weekly Scrum meeting?

- Implementing Routes protection for the pages created and authenticating users
- Work on the implementing the pricing strategy in the frontend

3. What task blockers did I have?

- Maintaining multiple states in redux

Sprint # 4 (April 8 to April 22)

1.What tasks did I work on?

- Frontend Integration for another set of apis in the ui
- Backend Route Protection using passport.js and jwt
- For Frontend Auth implement and install persistence state management.

2. What do I plan to do before the next weekly Scrum meeting?

- Resolve any merge issues from the branch merges

3. What task blockers did I have?

- No blockers
